

Scheduled Maintenance: Manchester DC7 Sonassi BGP Transit Link Migration

As part of our commitment to quality and continual improvement, we will be conducting a maintenance activity in our UK network to migrate the BGP transit connectivity link for the Sonassi platform from a legacy core device to a newer device as part of a core network refresh.

What will happen?

Our network engineering team will perform this work, and although we expect no interruption to service, the work should be considered at-risk.

When will the work be carried out?

The maintenance work will begin at 22:00 (GMT) on Thursday, 5th February and last until 01:00 (GMT) on Friday, 6th February.

Who will be completing the work?

Our experienced iomart network and infrastructure team will handle all the work.

Will I experience downtime?

As with any maintenance work, there is an increased risk to services. Customers should consider their services to be “at risk” for the entire duration of the maintenance window.

Regards
iomart Communications Team.
