

At Easyspace, we're focused on giving you dependable hosting, secure services, and great value for money. To continue improving our platforms, enhancing security, and investing in the technology that supports your services, we're making a small change to the price of some add-ons.

There's nothing you need to do – your services will continue as normal, and all your current features and benefits remain the same.

### What's changing?

From **April 2026**, the price of your add-ons will increase by **£0.45 per month**.

This small adjustment helps us keep your services stable, secure, and well-supported.

### What's not changing?

The following add-ons are **not** affected by this price increase:

- **Domain Protect (DNSSEC)**
- **Secure Hosting (SSL)**
- **IMAP My Email**

There are **no changes** to your Terms and Conditions (<https://www.easyspace.com/terms-and-conditions>) or to the CPI information shown at <https://www.easyspace.com/pricelist>.

We really appreciate you being with Easyspace, and we'll continue working hard to make sure you receive the best possible experience.
