

Scheduled Maintenance: Glasgow DC1 Easyspace Nexus Switch Replacement

As part of our commitment to quality and continual improvement, we will be conducting a maintenance activity in Glasgow (DC1) to replace a Nexus switch for Easyspace platform which has experienced a reload due to hardware problem.

What will happen?

Our network engineering team will perform this work, and although we expect no interruption to service, the work should be considered at-risk.

When will the work be carried out?

The maintenance work will begin at 20:00 (GMT) on Monday, 23rd February and last until 23:59 (GMT) on Monday, 23rd February.

Who will be completing the work?

Our experienced iomart network and infrastructure team will handle all the work.

Will I experience downtime?

As with any maintenance work, there is an increased risk to services. Customers should consider their services to be “at-risk” for the entire duration of the maintenance window.

Regards
iomart Communications Team.
