

Easyspace Web Hosting - One package, one renewal, full protection.

We know managing multiple add-ons and renewal dates can be frustrating. To make your hosting easier to manage and ensure you continue to get the protection you need, we're bringing key security and email features together into a single package called **Legacy Shield**.

By combining these services, we can offer clearer pricing, fewer renewals to track, and consistent protection across your hosting — all without losing any of the features you rely on

What's included

- Secure Hosting (SSL) to protect your website
- IMAP email access
- Weekly malware scanning, with one free restore per year
- An extra 1GB of email storage

What's Changing?

A Legacy Shield package will be added to your account for all web hosting packages purchased before April 2026, at a cost of £4 per month.

Legacy Shield combines key security and email features into a single, **Secure As Standard** package aligned with your hosting renewal.

Secure Hosting (SSL) protects your website, data, and reputation from attacks, downtime, and data loss, giving visitors confidence and helping keep your site online. IMAP My Email keeps your inbox perfectly synced across all devices, so your emails, folders, and sent items are always available wherever you work.

Any existing, separate Secure Hosting (SSL) or IMAP My Email packages will be cancelled to avoid duplication and keep your services simple and clear.

What's Not Changing?

There are no changes to your Terms and Conditions (<https://www.easyspace.com/terms-and-conditions>) or to the CPI information shown at <https://www.easyspace.com/pricelist>.

We really appreciate you being with Easyspace, and we'll continue working hard to make sure you receive the best possible experience
