

## Maintenance: New Security Patch for cPanel

---

We are writing to let you know that a cPanel & WHM security patch is expected to be released on Wednesday, May 13th 2026 - at 6pm UK time.

This release addresses multiple vulnerabilities across versions of cPanel & WHM, including fixes for the following vulnerabilities rated up to High severity.

CVE-2026-29205  
CVE-2026-29206  
CVE-2026-32991  
CVE-2026-32992  
CVE-2026-32993

All vulnerabilities were either responsibly disclosed by external researchers or identified internally by our security team. At this time, there are no known exploits or proof-of-concept code in the wild.

### Patch & Affected Versions

The patch will be available on May 13th 2026 - at 6pm UK time. and will be distributed through the standard cPanel automatic update process and through the manual update process. We strongly recommend performing a manual update once the patch is made available.

### Versions Impacted:

86, 94, 102, 110, 110 CL6, 118, 124, 126, 130, 132, 134, 136, 136 (WP2)

## What will happen?

---

We will patch all shared hosting servers, and Managed Servers at this point. Unmanaged server (VPS, Cloud & Dedicated servers) customers are advised to login and apply the patch themselves.

## When will the scheduled work be carried out?

---

The maintenance work will begin at May 13th 2026 - at 6pm UK time

## Who will be completing the work?

---

All the work will be carried out by our Iomart engineer.

## Will I experience downtime?

---

We do not expect any downtime during this maintenance window.

**Update:**

These patches were successfully applied to our Shared & Managed customer estates. For self-managed server customers, please follow the advice posted here:
