

Maintenance: Domain Services Availability

As part of scheduled maintenance, some domain services may be temporarily unavailable during the planned maintenance windows below.

What will happen?

During the maintenance windows, the following actions for domains may be temporarily unavailable: registrations, renewals, transfers, and updates to domain details, including nameserver or WHOIS changes. Existing domain names will continue to resolve as normal throughout the maintenance period. Any registration, renewal, or transfer requests submitted during this time will be processed automatically once the maintenance has completed.

When will the work be carried out?

The work will be carried out on Wednesday 24th June and Wednesday 1st July between 09:00 and 12:00 BST (UTC+1).

Who will be completing the work?

All work will be completed by our domain services provider.

Will I experience downtime?

Existing domain names will continue to resolve as normal throughout the maintenance period. However, you may be temporarily unable to register, renew, transfer, or update domain details during the maintenance windows. If you need to make changes to your domain name, nameservers, or WHOIS details, we recommend doing so outside of these maintenance windows.

Thank you,
Hosting UK
